

D A D E, 1694.

THE
COUNTRY-MAN'S
KALENDER,

For the Year of CHRIST, 1694.
Being the Second after Leap-Year.

Containing the Daily Motion of the Sun and Moon, with
the Aspects of the Planets, and their Conjunctions with
the Moon; And from thence the Inclination of the Air,
and Alteration of the Weather, throughout the Year.

Accommodated with other Useful Things; As,

- 1 The Suns Rising and Setting for every Day in the Year.
- 2 A Chronology of several Remarkable Things.
- 3 The Commencement of the Four Seasons, and their Nature.
- 4 The Eclipses of the Sun and Moon.
- 5 Physical Verses, and Rules for Husbandry and Gardening.
- 6 Observations and Natural Prognosticks for Weather.
- 7 How to judge of Diseases in Men or Women by their Urines.

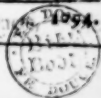

And for the Benefit of Country-Farmers,

An Account of several Diseases incident to Cattel
with their Causes, and the Cures of them.

Calculated for the Meridian of the Middle Part of
ENGLAND:

And so the more Useful for that, and the King-
dom of IRELAND also.

Printed by W. Cady, for the Company of Stationers, 1694.

Common Notes and Moveable Feasts, 1694.

According to the
English Account. Foreign Account.

1	0	0	1	0	0	2	0	0	3	0	0	4	0	0	7

The Use of the Table.

Example. To find the Interest of 70*l.* for 6 Months; Find 70*l.* in the first Column, and right against it, in the Column of 6 Months, is 2*l.* 2*s.* and so much is the Interest. For the Interest of the same Summ in 9 Months, look for the Interest in 3 Months, which is 1*l.* 1*s.* this add to the Interest for 6 months, the Summ is 3*l.* 3*s.* the Interest of 70*l.* in 9 months. Also to find the Interest of 75*l.* for 3 months: First, look the Interest of 70*l.* for 3 months, which is 1*l.* 1*s.* Likewise the Interest of 5*l.* for 3 months, is 1*s.* 6*d.* this added to 1*l.* 1*s.* maketh 1*l.* 2*s.* 6*d.* which is the Interest of 75*l.* for 3 months.

January hath xxxj Days.

- Full Moon the 1 day, at 24 min. past 11 before noon.

DADE.

A
Prognostication:

In which you may behold the
state of this Present YEAR
of our LORD GOD,
1694.

CONTAINING

The Description of the Four Seasons,
the *Eclipses*, the *Passions* of the *Planets*,
and the *Inclination* of the *Air*.

Also *Physical Verses*, and *Short Notes*
and *Rules* for *Husbandry*, for every
Month throughout the Year.

With divers other *Notes* and *Rules* of
Good Consequence, not formerly Published in
this **PROGNOSTICATION**.

By **WILLIAM DADE**, Gent.

LONDON,

Printed by **T. F.** for the Company of
STATIONERS.

Physical V E R S E S
AND
Rules for HUSBANDRY.

13

Of JANUARY.

I*f thou be sick, and help would'st have,
The Counsel of the Learned crave:
If thou hast health, to keep thee so,
Fly Idleness as deadly Foe.*

January's Instructions for Husbandry.

This Month set all kind of Fruit-Trees, and Quicksets: In the New or the Moon (the wind and weather observed) you may set Pease and Beans, Parsnips and Oats, if the weather prove mild, and the Moon decreasig.

Of FEBRUARY.

*Be choise of Food in any wise,
To keep thee warm also precise:
Beware likewise thou let not Blood,
Except the Learned say 'tis good.*

Februaries Instructions for Husbandry.

This Month set Roses, with all other kind of Plants and Quicksets, sowe Pease and Onions as in the Month before (the weather consider'd) you may now Garden for Sallet-herbs, Pot-herbs, and such like.

Of MARCH.

*Now Bleed, and Bath, if thou desire,
And Purge also (if need require)
Ill humors do in many breed,
Provide in time before you need.*

March's

March's Instructions.

This Month (in the New of the *Moon*) Graft,
Set Quick-sets, and Vines, Cut your Hedges
and Vines already growing. Also you may sowe
Onions, Beans, and Oats, and all manner of
Garden-herbs.

Of APRIL.

*Now wholsome Baths thou may'st frequent,
Let Blood also, and not repent;
These are good means thee to defend,
From Grievs, the which on thee attend.*

April's Instructions.

In this Month Pole your Hops, sowe Barley
and Artichokes, Bark Trees for Tanners, sowe
Hemp and Flax, set Cytrons, Melons and Cu-
cumbers, and furnish and replenish your Gar-
dens with Summer Herbs.

Of MAY.

*Rise early now this Month of May,
And walk the Fields that be so gay;
From Surfeiting see thou refrain,
Or sure it will procure thy pain.*

May's Instructions.

In the beginning of this Month you may
sowe the Seeds of Summer Herbs, which could
not endure the cold of the forepassed Months:
You may yet sowe Hemp and Flax: Weed your
Hop-Gardens, and take away superfluous
Branches, and Moss your Gardens.

Of JUNE.

*Drinks New or Sweet, Taste not at all,
For, thereby grows no danger small;*

*And, to thy self such pastime take,
As may in God thee merry make.*

June's Instructions.

In this Month (at the Full of the Moon)
Gather your herbs to keep dry for the whole
year, Weed your Corn-fields and Gardens, Set
Rosemary and Gilliflowers, Sow Lettuce, Sheer
Sheep, the Moon increasing.

Of JULY.

*Perfume thy house with Savours sweet,
But such as are for purpose meet,
Abroad as thou in Streets dost go,
Defend thy self from stinks also.*

1115

July's Instructions.

In this Month ply your Haying, Fallow your
Lands for Wheat, Pull up Hemp that is ripe,
get Rue and Wormwood to drive away Fleas
and Moths. Dry Flowers in the shade, and then
Sun them a little for fear of corruption.

Of AUGUST.

*As burning Heat will thee destroy,
So shivering Cold will thee annoy;
Let little sleep thee now content,
Purge not, nor Bleed, lest thou repent.*

August's Instructions.

Reap Wheat and Rye, cut down your Cuts;
Gather Garden-Seeds. Sow Lettuce and other
Winter Herbs in the New of the Moon: Use
moderate Diet, forbear to sleep presently after
meat, take heed of sudden cold after great
heat.

OF SEPTEMBER.

*Raw Fruits (though ripe) may Sickness bring,
Unripe much eat, a dangerous thing;*

*If now a Surfeit thou dost take,
When others sleep thou must awake.*

September's Instructions.

Set Artichoaks, Sow Seeds for Winter herbs, gather Hops and Apples, and other Fruits (which are fit to be gathered) about the Full of the Moon, the weather being dry. Cut Quicksets, Sow Wheat and Rye, kill Bees, make Verjuice, Sow Parsnips and Carrets; Remove and set Slips of Flowers; Set Roses, Strawberries and Barbaries: and remove Trees every New Moon till February.

OF OCTOBER.

Warm Cloaths must now provided be,

Also warm Meats are good for thee.

Have good regard thy feet be dry,

Thou shalt avoid much harm thereby.

Octobers Instructions.

Remove your Plants and Trees in the New of the Moon, and about the Full of the Moon gather such Fruit as you left ungathered the last Month. Set all kind of Nuts and Acorns: And cut your Rose-Trees but once in two years, if you intend to have store of Roses.

OF NOVEMBER.

If Rheums do now molest thy Head,

It is not ill to sweat in Bed;

Feed on good Meats if Stomach serve,

Else seek for that which doth preserve.

To take Vomits, the *Moon* being in *Taurus*,
Virgo, or the latter part of *Sagittarius*.
 To purge the Head by Sneezing, the *Moon*
 being in *Cancer*, *Leo*, or *Virgo*.
 To take Clifters, the *Moon* being in *Aries*,
Cancer, or *Virgo*.
 To stop Fluxes and Rheums, the *Moon* be-
 ing in *Taurus*, *Virgo*, or *Capricorn*.
 To Bathe, when the *Moon* is in *Cancer*, *Li-*
bra, *Aquarius*, or *Pisces*.
 To cut the Hair off the Head or Beard,
 when the *Moon* is in *Libra*, *Sagittarius*,
Aquarius, or *Pisces*.

Other brief Observations of Husbandry.

SET, fowe Seeds, and Graft, the *Moon* being
 in *Taurus*, *Virgo*, or *Capricorn*.
 And all kind of Corn in *Cancer*.
 Graft in *March* at the *Moons* increase, the be-
 ing in *Taurus* or *Capricorn*.
 Shear Sheep at the *Moons* increase.
 Fell hard Timber from the Full to the Change.
 Fell Frith, Coppice, and Fuel, at the First
 Quarter.
 Lib or Geld Cattle, the *Moon* in *Aries*, *Sagi-*
tarius, or *Capricorn*.
 Kill Fat Swine for Bacon (the better to keep
 their Fat in boiling) about the Full Moon.

*Natural Prognosticks for the Judgment of
Weather.*

THE foregoing Rules for the Judgment of the Weather, are such as are deduced from the Aspects of the Planets to the Moon, and among themselves; These here following, are such as are deduced from Philosophical Aphorisms. Therefore,

1. The resounding of the Sea upon the Shoar, and the murmur of Winds in the Woods, when the Wind is not stirring abroad, doth shew Wind to follow.

2. The obscuring of the small Stars, fore-shews Tempests.

3. When Stars seem to shoo, Wind comes from that Quarter.

4. If two Rainbows appear, Rain follows: But a Rainbow appearing after Rain, signifies fair Weather.

5. If the Sky be red in the Morning, it is a sure token of Wind or Rain to follow, or both; for the Vapors which cause that Redness will soon be dissolved.

6. If the Sun or Moon look pale, look for Rain; if fair and bright, fair Weather; if red, Wind.

7. If a dark Cloud be at Sun-rising, in which the Sun is soon after hid, it will dissolve it, and Rain will soon follow.

8. If a Cloud appear, and afterwards Vapors are seen to ascend up to it, it portends Rain.

9. If

9. If the Sun appear in the East, greater than it usually doth, it is a sign of Rain.

10. If a black Cloud appear in the West about Sun-setting, it will Rain that Night, or the Morning following.

11. If Mists come down from the Hills, or descend from the Sky, and settle in the Vallies, it promiseth fair and hot Weather. Also Mists ascending in the Evening from the Earth or Water, shew a hot day to follow.

12. Water-Fowls (as Sea-gulls, More-hens, &c.) when they flock and flie together from the Sea toward the Shore. Also when Land-Fowls (as Crows, Swallows, &c.) when they flie from the Lands to the Waters, beating the Waters with their Wings, fore-shew Rain and Wind.

13. If the Circles about the Sun be red and broken, it portends Wind; if thick and dark, Wind, Snow, or Rain, and the same of the Circles about the Moon.

14. The Trefoil Grass, against Rain, swells in the Stalk, and standeth more upright.

15. The Winckpipe (growing in Stubble-fields) if you find it open in the Morning, be sure of a fair Day to follow.

16. Aches, Hurts, and Corns, do engrave against Rain, Snow, or Frost.

17. Worms coming out of the Earth, Moles casting up the Earth, Fleas biting more than ordinary, are evident Signs of Rain to follow.

18. Solid Bodies, as Stone and Waincot, when they sweat, doth fore shew Rain.

Nath.

*Natural Prognosticks of Pestilential, and
Unwholsome Years.*

1. **W**Hen there are great number of Frogs, Flies, Locusts, &c. For these Creatures being ingendred of Putrefaction, shew a general disposition of the Year, and constitution of the Air to putrefaction.

2. When Worms are found in Oak-Apples.

3. Great and early heats in the Spring (and chiefly in *May*) without Winds.

4. Great drought in Summer, continuing to the end of *August*, portend a Pestilentious Summer the next year.

5. The Small Pox, Purples, and Agues in the Summer, and hovering all the Winter, portend a great Pestilence the Summer following.

6. A dry *March* and a dry *May* portend a wholsome Summer, if there be a showring *April* between.

Signs of a Sound and Pure Air.

1. A Sound and Pure Air is made not presently after the Sun-rising, and is made cold immediately after his setting.

2. That which yieldeth a pleasant smell after Rain, clear, and not evaporated, open and lightsome, and when the North-wind bloweth.

3. Where there are Easterly Winds in the Mornings.

Signs of Corrupt and Infectious Air.

1. A Corrupt and Infectious Air is made by the often blowing of the South, or South-East Winds:

Winds: or by the West, or South-West Wind in the Evening.

2. When the Air is cold long after Sun-set.
3. When the Air is long hot after Sun setting.
4. When the Air is long close, cloudy, or thick.

How to judge of Diseases by the Urine.

1. **U**Rine fat and troubled, betokens a burning Fever of choler: Or red and thick all over, with a black Circle, sheweth sickness all over the Body.
2. Urine white and thin, and little in quantity, sheweth cold in the Body.
3. Urine clear, with a black Circle, sheweth the sick Person hath the Ptsick.
4. Urine red and thin, with a bright Circle, shews a bad Stomach.
5. Urine thin, and greenish above, shews a cold Complexion: if blew in casting, 'tis the Ptsick.
6. Urine thin, if it shew black above, betokens great loss of Nature.
7. Urine thick and troubled like Horse-piss, signifies the Head-ach.
8. Urine fat in the bottom, white in the middle, and red above, shews a Quartan Fever.
9. Urine fat like Flesh, with dregs in the bottom like shadowing, shews the Dropsie by cold: But if it be wheyie above, clear in the middle, and shadowing beneath, it shews a hot Dropsie.
10. Urine with black dregs in the bottom, like gobbets of Coles, sheweth Worms.

II. Urine

11. Urine with black Contents (as moaths) in the middle, shews an Impostume.
12. Urine with Contents like shavings of Parchment in the bottom, sheweth stopping of Reins and Pipes of the Liver.
13. Urine black and green, with long white Contents, signifies the Palsie.
14. Urine that hath Grains under the Circle, sheweth the Stomach is full of Worms, and also burning of the Heart.
15. Urine foul above, sheweth heat in the Heart, Lungs, and Spleen.
16. Urine with black Contents in the bottom, shews Costiveness.
17. Urine that is long lasting, betokens biting in the body, and great Rheume.
18. Urine thick, little in quantity, and high coloured, shews great burning in the Body.
19. Urine Frothy, clear and a little Red, shews pain in the right side.
20. Urine Frothy, sheweth wind and pain under the left side.
21. Urine very Red, sheweth an Impostume on the Liver.
22. Urine as Red as burn'd Gold (if it be Hydropick) betokens Death.
23. Urine in a hot Fever, one part Red, another part Black, another part Green, and the other Blue, betokens Death.
24. Urine in hot axis, Black, and little in quantity, and stinking, betokens Death.
25. Urine all coloured as Lead, sheweth a prolonging of Death.

26. Urine

26. Urine dark, and clear beneath, betokeneth Death.
27. Urine that shineth raw and white (if the skum in the bottom shines not) sheweth Death.
28. Urine thin in substance, fleeting above like a dark Skie, betokens Death.
29. Urine dirty, sinking, and a dark Skie, betokens Death.
30. Urine like Water, with a dark Skie, in a Fever sheweth Death.
31. Urine with dregs in the bottom, mingled like Blood, sheweth Death.
32. Urine black and thin, (if the sick do loath when he goes to the Stool, and speaks overthwarr, or understands not aright) if his sickness goeth not from him, it signifieth Death.

A Description of the Magnitudes, Motions, and Distances of the Seven Planets.

A *Rgol*, a laborious and learned *Astronomer*, giveth this account of the Planets Motions and Distances, to wit:

The Sun is greater than	[<i>Saturn</i> , Nine times.
	[<i>Jupiter</i> , Fourteen times.
	[<i>Mars</i> , Two thousand five hundred thirty five times.
	[<i>Venus</i> , Twelve hundred and seventy times.
	[<i>Mercury</i> , Three thousand seven hundred and five times.
	The <i>Moon</i> , Ten thousand times.
	[The <i>Earth</i> , One hundred ninety six times.

Saturn

Jupiter, The one half.
Mars, Two times.
Venus, Two hundred eighty six times.
Saturn is greater than *Mercury*, Four hundred and eighteen times.
 The *Moon*, One thousand one hundred twenty two times.
 The *Earth*, Twelve times.
Mars, One hundred eighty two times.
Venus, Eighty four times.

Jupiter is greater than *Mercury*, Two hundred sixty six times.
 The *Moon*, Seven hundred and Fourteen times.
 The *Earth*, Fourteen times.

Venus is twice as big as *Mars*, and three times as big as *Mercury*.

Mars contains *Mercury* once and an half.

The *Moon* is greater than *Mars*, Thirteen times.
Venus, Six times.
Mercury, Nineteen times.

The <i>Earth</i>	} is distant from	} the <i>Firmament</i>	49150720
<i>Saturn</i>			127864480
<i>Jupiter</i>			35425120
<i>Mars</i>			47490640
The <i>Sun</i>			44720000
The <i>Moon</i>			48958080

} <i>Saturn</i> is distant from	<i>Jupiter</i> —	23138640	} Miles.
	<i>Mars</i> —	29316440	
	The <i>Sun</i> —	3193352	
	The <i>Moon</i> —	36171600	

Jupiter

Jupiter is distant from $\left\{ \begin{array}{l} \text{Mars} \text{---} 7722800 \\ \text{The Sun} \text{---} 9294880 \\ \text{The Moon} \text{---} 13532960 \end{array} \right\}$ Miles.
Mars is distant from $\left\{ \begin{array}{l} \text{The Sun} \text{---} 1572080 \\ \text{The Moon} \text{---} 6310160 \end{array} \right\}$ Miles.

The Sun is distant from the Moon 4238080, that is, Four Millions, Two hundred thirty eight thousand, and eighty Miles.

Hæc incredibilia videntur tantum iis, qui Mathematicis demonstrationibus non assueverunt, &c.

Of the Four Quarters of the YEAR
1 6 9 4.

Of WINTER.

Winter Quarter (after the *Astronomers* Account) began the 11th of December, 1693, at 43 min. past 1 in the Morning, and continues till the Tenth of March this year 1694. So that always the first part of the Astronomical Winter Quarter, is in one Politick year, and the latter end thereof is in the other. At which time was the shortest day of the year, by reason of the Suns greatest declination from the Equinoctial Line.

This Season of its own disposition, is known to be cold and moist, contrary to the quality

quality of the Summer ; and, in this Quarter the inward parts of Man are very hot, and being healthful, may receive plenty of Food, because natural heat is now comforted, and is gone inward, and there increaseth, and maketh Digestion the better.

The Sickneses whereunto this Quarter is most inclined, are *Rheums, Gouts, Pusles, Sore Eyes, Melancholy, Coughs, Catarrhs, Scitation's, Falling-Sickness, Diseases proceeding of Rottenness and Corrupt Humors*; with divers kind of *Infirmities* incident among Women.

Of the SPRING.

THE Spring-time (being the most pleasant and Wholsom Season of the Four) taketh its beginning on Saturday the Tenth of *March*, 14 min. after 1 in the Morning, when the Sun entreth into the first minute of the Equinoctial point *Aries*, making the days and nights of equal length; which Quarter endeth the 10th of *June*, when the Sun entreth into *Cancer*.

This season is naturally hot and moist, and is of the Sanguine complexion, being the most temperate and healthful time of the year, and is therefore accounted the fittest time to ease diseased Bodies in, and to restore health again in those in whom formerly it hath been decayed by any kind of evacuation.

The Infirmities of this Quarter are *Melancholy, Madness, the Falling Sickness, Bleeding at the Nose, Hoarseness, Coughs, Itch, Scabs,* many

many *Ulcers*, and small *Apoſtumes*, the *Gout*, and *Pain in the Joynts*, *Pleurifies*, *Dropsies*, *Pestilene Agues*, *Shortneſſe of Breath*, *Faintings*, *Pain in the Head*, *Eyes*, and *Stomach*, *Rotten Feavers*, and other *Strange Diſeaſes*.

Of SUMMER.

Summer (accounted the Third part of the Year *Aſtronomical*) taketh always its beginning at the time of the Suns entrance into the firſt min. of the Solſtitial Sign *Cancer*, which is this year on Monday the 11th. of *June*, at 4 in the morning; at which time he makes his greateſt declination from the Equinoctial towards the North, and cauſeth the longeſt day and ſhorteſt night in the year; and ſo Summer holdeth on till the 12th of *September* following.

In this Quarter the Stomach cannot digeſt ſuch hard Meats as it will in the Winter ſeaſon, for that natural heat is now diſtributed into the exterior parts, and man is not now ſo hot within as in Winter.

The Sickneſſes at this time are divers, as *Burning Agues*, *Pleurifies*, *Frenſies*, *Hot Apoſtumes*, *Divers pains in the Head*, *Sundry Inflammations*, and *New Infirmities*, proceeding eſpecially of *Hot Cholerick Humors*, wherewith many will be ſore moleſted.

Of AUTUMN or HARVEST.

Autumn or Harvest (being the Fourth, or laſt Quarter of the Year) beginneth upon Wednesday the 12th of *September* at 4¹ min.

B

after

after 7 at Night, the Sun then making his entrance into the first minure of the second Equinoctial Sign *Libra*, working the same effect that he did at his entring into *Axis*, that is, making the days and nights of equal length, rising at six in the morning, and setting at six at night; and this Quarter doth last until the eleventh of *December* following.

The quality of this Season is naturally cold and dry, yet, by reason of its mutability, it is the most unwholesome; by means whereof, it is more subject to sickness than any other: for the dregs of all diseases, of the former parts of the year, will now break forth and be seen.

The Diseases of this Quarter are like to be many and dangerous, as *Black Jaundices*, *Melancholies*, the *Falling-Sickness*, *Oppilations in the Spleen*, *Difficulty of Breathing*, *Convulsion Fits*, *Dropsies*, *Sciaticas*, *Biles*, *Tooth-ach*, and many more: *From which good Lord deliver us.*

Of the ECLIPSES this YEAR.

THERE will be Four Eclipses this Year, Two of the *Sun* and as many of the *Moon*; of which only One of them (and that of the *Moon*) upon the 26 of *June*, will be conspicuous to the Inhabitants of *England* and *Ireland*. It is celebrated in the Tropical Sign *Cancer*, at 10 min. before 12 at Midnight, on the 26th day aforesaid, and the greater half of the *Moons* body will be obscured.

Of

Of Several Diseases incident to
HORSES and other CAT-
TLE, with Their CAUSES
and CURES.

I. *To help a Beast that Pisseth Blood.*

TAKE of Bloodwort, of Shepherds
Purse or Knot-grass of each a like
quantity, and stamp them together;
then strain them with a quart of Milk of one
coloured Cow, and put them into a little
Runnet made of the same Milk, and mix
therewith the Leven of brown Bread: Then
strain them altogether and give it with a Horn.
Use this Morning and Evening.

II. *A Remedy for the Blain in the Tongue.*

It is a certain Bladder growing above the
Root of the Tongue against the Pipe, which
grief at length with Swelling, will Choak
and stop the Wind: You may perceive this
Distemper by his Gaping and holding forth
of his Tongue and foming at the mouth,
without a speedy Remedy it will kill him—
The Cure is to cast him and to take forth his
Tongue and slit the Bladder, or break it there-
on; then wash it with a little Vinegar and
Salt and he will recover.

III. *To help a Beast that is Goared.*

Take Ashes finely sifted and mix them with the Grounds of Ale or Beer, making it as thick as Butter, lay it thereon and it will heal it.

IV. *A Remedy for the Fantasie in a Beast.*

This Disease will shake him much, and make him quiver in the Flanks and to pant extreemly: For the Cure, you shall give him some Runnet, Soot and Chamber-Lie mixed together.

V. *To kill Lice and Ticks in Cattle.*

Take the Decoction of wilde Olives mixed with Soot, with this, Rub and Chase the Beast all over — Otherwise, take the Herb Bear-foot, Stamp it, and then strain it with Vinegar mixed with it, and so apply it.

VI. *An approved Remedy for the Tetters in Cattle.*

This Distemper is an ill-favoured Scurff or Scab, growing on the Skin or outward parts of the Beast. Some Tetters are broad and some will grow long, and hang like to a Cluster of Grapes, somewhat hard: It is supposed that they are increased through leanness and VVet, or it may proceed from some Venomed Humour, or by some Prick or Bruise: The running or broad Tetters, is Cured by searing it round about with a hot Iron, then lay Tar on it, and it will take it away — Some say, that when the Beast begins to be in good case,

case, and lusty with eating of Grass, that it will wear away of it self by degrees; for he hath it for the most part in the Winter and not in the Summer.

VII. *An excellent Remedy for the Lungs of Cattle infected.*

The Cure is, you must pierce one of his Ears with a Bodkin, and being so pierced, put into the holes the burnt Roots of Hazel-Trees; then take a quantity of the Juice of Leeks, with so much Sallet Oyl, and mix it with a Pint and half of Wine, and give it him fasting: Use this Nine days together and he shall recover. This Distemper proceeds from the Lights and Lungs of a Beast infected, which will cause him to grow lean, till at length a common Cough will sodry his Body, that it will kill him.

VIII. *A Remedy (which fails not) to cure a Beast that cannot Piss.*

Steep Cardus Benedictus, being bruised, in VWhite-VVine, and give it to the Beast — Give an Ox that cannot Piss, warm water mixed with Bran; also, stamp Sowthistles and heat it with Ale or Beer, and it will help him.

IX. *To recover the Leanness of a Cow.*

You must make a Drink and give it her fasting, which is this: Take of Long-Pipper of Madder, of Bark of VVallnut-Tree and Turmeric, with some Bays, of each a like Portion:

on: Beat them into fine Powders, and put them into a a Pint of Ale, Luke warm, and she will be in good liking and far better plight.

X. Remedies against the Worms in Cattle.

Take and stamp Garlick, and mix it with Milk or Ale, and give it to the Beast — Or take a handful of Wood Sage, or Wilde Sage, bruise it, and straine it with Ale and give it; either of these are approved Medicines.

XI. An excellent Remedy for the Dropping Nostrils and Watery Eyes of Cattle.

Take Salt and Savory mixed together and rub his Throat and Jaws therewith: Also you may rub and Chase the said parts with Brine and Garlick mixed together, or squirt into his Nostrils the juice of Pimpernel mixed with a little White Wine: All these are excellent good.

XII. To Cure the Gorget in the Maw.

This dangerous Distemper proceeds from the Beasts over eating of Crabs or Acrons, which for the most part they swallow whole without breaking or chewing; so that they lie so in lumps in the Maw that they cannot digest them, and at length will sprout and grow in the Maw. To Cure this, Take a good quantity of whole Mustard-seed and mix it with Wine and Strong Ale, and give it to the Beast.

XIII. A sodain and approved Remedy against a Sprain or Stroak.

Take Butter, Black Soap and Hemlock,
with

with a quantity of Salt and Oyle proportionable, and mix them all together. Bathe the Sprain or Stroak therewith, as hot as he can endure, it and it will Cure him. — But if it be in the Legs, you must put unto the things aforesaid grounds of Beer or Ale and wash them therewith, and wrap them about with a hair Rope dipped in Chamberly and the Beast shall do well.

XIV. *To Cure Calves that have the Worms
in their Bellies.*

These Worms will annoy them much and at length prove dangerous, they will take away their Stomachs to their meat. The best Remedy is, to take Lumpin Pease half raw, bruise them and divide them into small pieces, make them to swallow them, do this every morning and it will heal them.

XV. *An approved Remedy for the Costiveness in Cattle.*

A Swelling in Oxen or Kine, is procured through heat, so that they cannot dung. The Cure is, to Chase and Drive them apace up and down: If they do not then dung, anoint your hand with Oyl or Groase, then rake them, and take forth their Dung.

XVI. *An excellent Cure for a Beast that is
Hids-bonnd.*

This Disease happens to an Ox, when he hath been over Laboured. For the Cure, Seeth Bay-leaves in Ale, and bathe him therewith,

with, and immediately chafe and rub him with Oyl and Wine mixed together, and so pluck and draw the Skin on both his sides, till you have by degrees loosed it from his Ribs: Do this in a Sun shining day that it may the better soak in and dry.

F I N I S.

ADVERTISEMENT.

MR Robert Bateman's famous Spirit of Scurvey-grass, both Plain and Golden, which has performed so many eminent Cures in the *Dropsie*, *Scurvey*, and other Distempers, are still rightly prepared by *John Hooker* in *Pauls Chain* near *Dollers Commons*; price 1 s. the Bottle.

The *Grand Balsamick* or *Health procuring* or *preserving Pills*, approved by the most eminent Physicians, to be one of the safest and most pleasant Purgers. Their Vertues are printed, and sold by *John Hooker* in *Paul's Chain* near *Dollers Commons*; price either 6 for 8 d. or 9 for 1 s. with printed Directions.

*Books Printed for, and Sold by Edward Brewster,
at the Crane in St. Pauls Church-Yard.*

THE Mirrior of Marters, lively expressing in a short view, the force of their Faith, the fervency of their Love, the Wisdom of their Sayings, the patience of their Sufferings, with their Prayers and Preparations for their last farewell.

THE last Will and Testament of *Basil Valentine*, which was found hid behind the Altar of the Cathedral Church of *Erford*: To which is added 2 Treatises, the 1. Declaring his manual operations, the 2. Shewing things natural and supernatural, never before Published in English.

Moses Revived, or a Treatise, shewing the Unlawfulness of Eating Blood.
